

4 June 1981

MEMORANDUM FOR: Chairman, DCI Area Building Planning Subcommittee
FROM: Administrative Officer, OLC
SUBJECT: Responses to Questions on Requirements for
1987 and 2000

STAT The following are the Office of Legislative Counsel responses to question 4 of [] memorandum on "Project Organization":

a.(1) There are no OLC personnel outside the Headquarters building.

a.(2) All of OLC is covered by this planning assumption.

b. OLC does not envisage any significant increase in ceiling either by 1987 or by 2000.

c. OLC will be installing Delta Data 5260's in the next few months. We are planning to eventually have about 15 terminals. This could increase to about 35 by the year 2000. We have 3 VyDec and one Lexitron (which we intend to exchange for another VyDec). When we are up to strength with the Delta Data terminals, we will then no longer require the VyDec machines. We will not have any requirement for special purpose centers.

d. Other than what is mentioned in c. above, we have no other special requirements that we can foresee.
